Discover the ARANIK range

From Orchard to Home

The Aranik Agricultural Complex supplies Aranik's pistachios from the Nuq region of Rafsanjan. For over 100 years, pistachios from these orchards have been part of Iranian celebrations and traditions.

Wheat, barley and summer crops were once widely grown in this area. About a century ago, local farmers began cultivating pistachio orchards in the Rafsanjan region. Pistachio farming later expanded to other areas.

The Story of the Aranik Brand

Building on this heritage, Aranik began operating in 1986 to bring pistachios directly to customers. We combine modern technology with specialist knowledge and extensive experience in storing, packaging and selling pistachio products.

Our aim is to maintain product safety and consistent quality while offering fair, competitive prices.

We make buying pistachios simple and convenient, helping customers save time and enjoy the distinctive taste of Aranik pistachios.

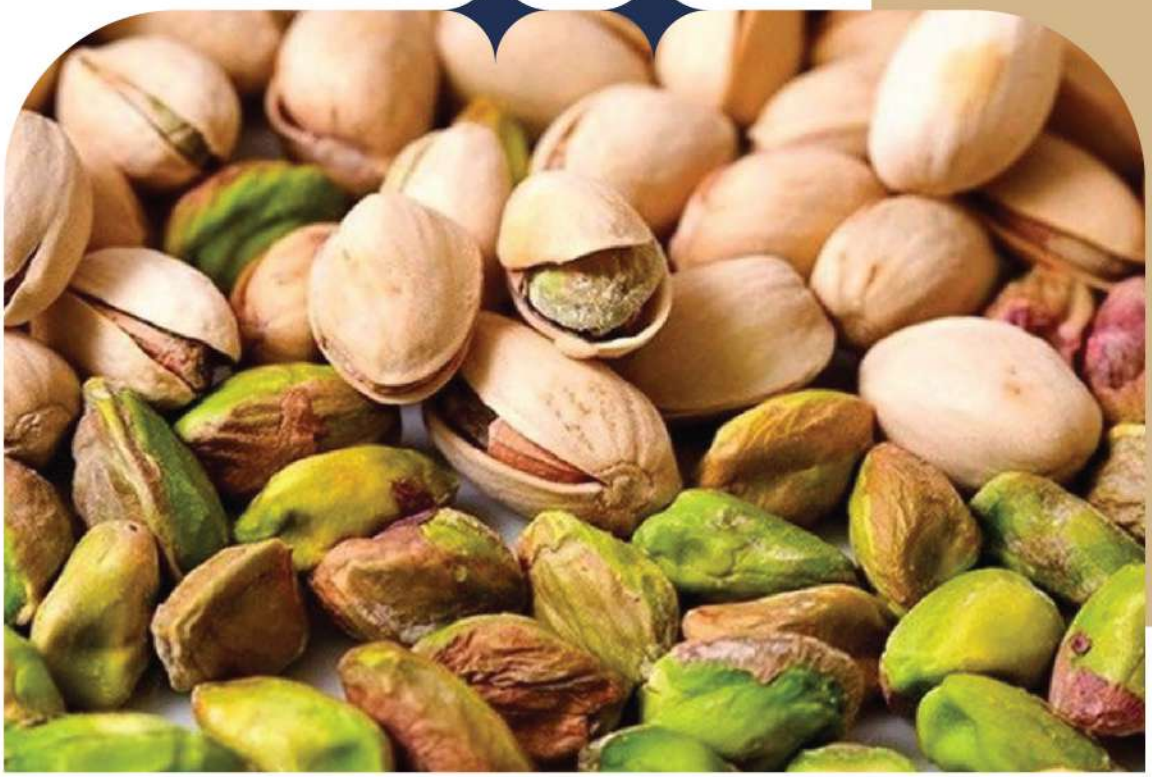

Pistachio Origins

The Aranik Agricultural Complex began its operations in the Nuq region of Rafsanjan. Pistachios from these orchards have been enjoyed at Iranian celebrations for over 100 years.

Aranik's Ahmad Aghaei pistachios are grown in the Nuq region of Kerman Province and the Marvast region of Yazd Province. This variety is prized for its flavor.

Careful Processing

Natural Ingredients, Carefully Roasted

Aranik Roasted Pistachios

Prepared with Natural Ingredients

Aranik's roasted pistachios are made with natural ingredients and no artificial flavors or colors. Seasoned with verjuice (unripe grape juice) and salt, they are roasted using indirect hot air. The finished pistachios have a distinctive, subtle reddish hue.

Aranik's raw Ahmad Aghaei pistachios are available in two sizes: large, averaging 24 nuts per ounce, and medium, averaging 27 nuts per ounce. Both sizes are sold unroasted in 500 g packs.

Raw Ahmad Aghaei Pistachios

Large & Medium Sizes Available

Roasted Ahmad Aghaei Pistachios

Roasted and Salted

Aranik's roasted Ahmad Aghaei pistachios are available in two sizes: large, averaging 24 nuts per ounce, and medium, averaging 27 nuts per ounce. Both sizes are roasted, salted and supplied in 500 g packs.

Size Grading

Sorted for Consistent Size

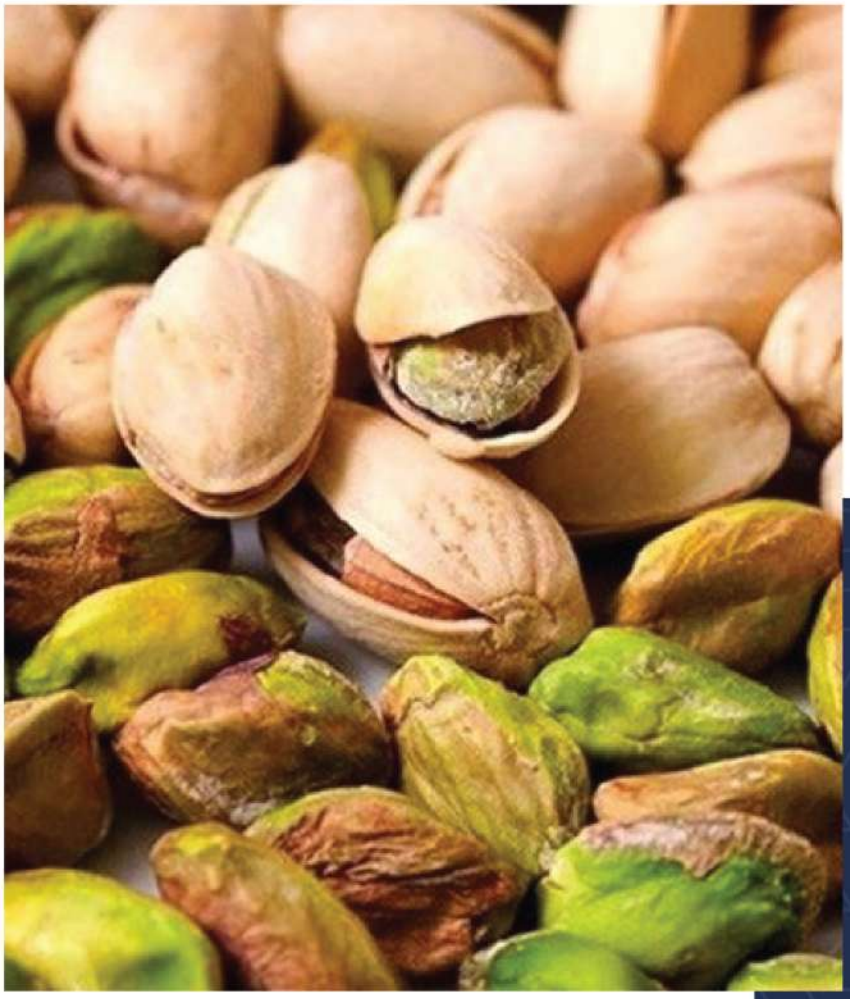

Packaged Raw Pistachios

Ahmad Aghaei Pistachio

Aranik's Ahmad Aghaei pistachios are grown in the Nuq region of Kerman Province and the Marvast region of Yazd Province. This variety is known for its elongated shape and distinctive flavor.

Size Grading

Precision Machine Sorting

Aranik's pistachios are machine-sorted into uniform size grades. Large pistachios average 24 nuts per ounce, while medium pistachios average 27 nuts per ounce. One ounce is approximately 28.35 g.

Raw Pistachio Processing and Storage

Maintaining Natural Quality

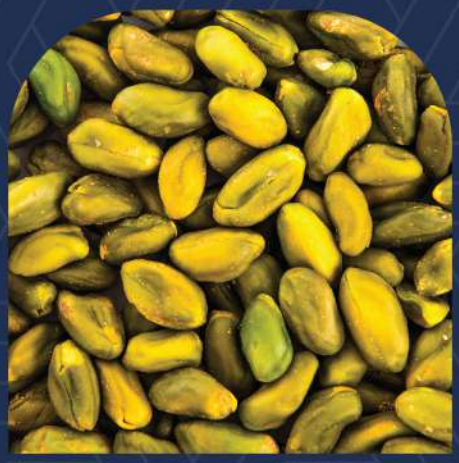

After grading, Aranik's raw pistachios are stored under appropriate temperature and storage conditions. They are then packaged without further processing or added ingredients.

Packaged Roasted Pistachios

Flavor and Quality

Roasted Pistachio Processing

Natural Ingredients, Indirect Roasting

Aranik's roasted pistachios are made with natural ingredients and no artificial flavors or colors. Seasoned with verjuice (unripe grape juice) and salt, they are roasted using indirect hot air. The finished pistachios have a distinctive, subtle reddish hue.

Precise Pistachio Sorting

Uniformity by Size

After closed-shell (unopened) pistachios are removed, Aranik's pistachios are machine-sorted by size. This produces more uniform grades and a consistent product presentation.

Depending on the variety, size grades range from 18-20 to 30-32 nuts per ounce.

Custom Packaging Options

Our design and production team can develop tailored packaging for custom orders.

Premium Pistachio Kernels

Raw & Roasted Options

Aranik offers a range of pistachio kernels, available raw or roasted in different flavors. Carefully selected pistachios are shelled under hygienic conditions, then packaged for sale.

Fresh Aranik Pistachios

Extended Shelf Life

Fresh pistachios are harvested in late summer and early autumn, during the Iranian months of Shahrivar and Mehr. They are often sold loose rather than in protective packaging. Their high moisture content and soft outer hull make them perishable, even when refrigerated.

Drawing on its experience in pistachio farming and collaboration with food science researchers at Kerman University, Aranik has developed packaged fresh pistachios. The packaging allows the product to retain its quality for more than two weeks under refrigeration, without added preservatives.

Freshness-Preserving Packaging

Hand-Picked and Quality-Checked

Quality Assurance

Preserving Freshness and Quality

Aranik's fresh pistachios are hand-picked daily, quality-checked and promptly packaged. Appropriate storage and transport conditions help maintain freshness and quality.

Controlled storage is part of Aranik's approach to managing the risk of aflatoxin contamination. Aflatoxins are toxins produced by certain molds.

Features of Fresh Aranik Pistachios

More Than Two Weeks of Refrigerated Shelf Life

- Temperature-controlled handling: Stored and transported under appropriate conditions from packing to delivery.
- No added preservatives: Packaging helps preserve freshness and limit microbial activity.
- Hand-picked: Harvested daily and promptly packed after quality checks.
- Washable packaging: Sealed against air and water so the outside can be washed to remove surface dirt.
- Freshness and quality: Packaging designed to maintain product quality during storage.
- Aflatoxin-Free
- Available Outside the Harvest Season

Extended Shelf Life

Fresh Pistachios - A World First

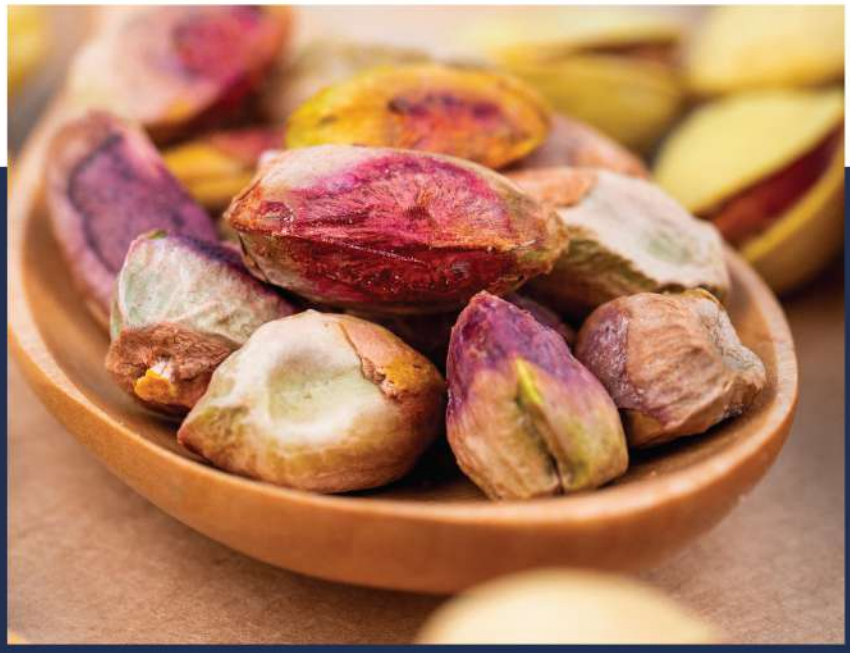

Fresh for More Than Two Weeks

Controlled-Atmosphere Packaging

Aranik is the first brand in the world to produce fresh pistachios with an extended shelf life. Harvested daily and quality-checked, the pistachios are packed using controlled-atmosphere technology without added preservatives.

Products are prepared, stored and transported under hygienic conditions and at appropriate temperatures to maintain freshness.
